Air volume	Speed	Noise
183 m <sup>3</sup> / min	1180 R / min	38 db

### INSTALLATION GUIDELINES

All wiring must be installed by a qualified/licensed electrician.

- 1 Use the provided template to make the mounting holes and cut them with a jigsaw, keyhole saw, or hacksaw.
- 2 Install 4 pallet screws on each of the four sides of the body grooves.
- 3 Place the body along with the support plate on the integrated ceiling grid.
- 4 Hold both sides of the panel with both hands and insert it into the grooves on both sides of the body.
